### Hot air rises, and rising air cools

By following the natural convection of air, ALTA G1M's layout design combined with a pre-installed Air Penetrator 180mm fan, contributes to excellent bottom-to-top directional airflow (stack effect), which takes advantage of hot air's natural tendency to rise.

### Built for the highest-end of today's components

ALTA G1M is compatible with a maximum of a 360mm radiator whilst capable of accommodating graphics cards of any length, and of any height up to 4 slots.

Lightning speed connection with endless boundaries
