

AK3 RGB

The AK3 RGB puts the focus on a classically minimalist design with an air-permeable front panel and a high level of functionality. With its modern connection options, space for large pieces of hardware, and room for up to eleven fans, this case is suitable for either gaming, office or multimedia PCs.

Features

■ FOUR PRE-INSTALLED FANS

A total of up to eleven fans have room in the AK3 RGB, four of which are already pre-installed: Three addressable 120 mm RGB PWM fans are located behind the front panel and an identical fan is on the rear panel.

■ OPTION FOR DUAL RADIATORS

Those who prefer water cooling will also be happy with the AK3 RGB, as two radiators with up to 360 mm can be simultaneously operated, if required.

■ COMPATIBLE WITH ATX AND BTF MAINBOARDS

Apart from conventional mini-ITX, micro-ATX or ATX mainboards, the AK3 RGB is also compatible with almost all BTF formats on the market.

■ MODERN CONNECTION OPTIONS

To connect a wide range of mobile and peripheral devices, the AK3 RGB has a modern TRRS and USB-C port on the front of the top panel. In addition, a controller provides the connection and operation of up to four RGB LED components while also serving as a hub for up to four PWM fans.

■ PLENTY OF SPACE FOR HARDWARE

The inside the AK3 RGB has been designed to accommodate large graphics cards with a length of up to 41 cm, while the mounting is supported by a rubber-surfaced graphics card holder. In addition, a CPU cooler with a height of up to 17 cm can be installed, as well as a power supply unit with a length of up to 23.5 cm. And there is installation space for up to two 3.5" HDDs or four 2.5" SSDs.
